## Welcome to a new school year,

We wish everyone, staff, students, children and guardians a warm welcome to a new semester, look forward to meeting and working with all of you.

During the autumn, we all need help, to hold on and persevere, protect each other, our mood and our health as we still have covid-19 in our society. The administration expects everyone to take responsibility and adhere to prevailing guidelines. Be at home in case of symptoms. Healthy children and students should participate in the teaching and are welcome to preschool and school.

For our operations, it is a matter of resuming the attitudes and changes that were implemented during the spring. Hand washing is done and should be done often. Keeping distance in the business environments, however, we know that the conditions for distance differ based on the nature, number and age of premises on our children and students.

*” We should not shake hands with each other, but we must take care of each other”*

Greetings,
