Information on the current situation for guardians in Ludvika Municipality's schools and preschools, 2020-05-08

The educational process is still ongoing and the impact on COVID-19 is varied.

We have preschools and schools where the staff's situation is affected more than others and we have preschools and schools where the attendance for children and students varies.

From the administration, we again want to point out that it is healthy children, students, guardians, and employees who should and can attend in or within our education and our premises.

Our estimation is that we now have COVID-19 around us, in Ludvika's community, and its surroundings. Therefore, it is of utmost importance that YOU who knows or exhibits symptoms stay at home. Do not go to preschool or school to leave and pick up children and students. Only those who are healthy can leave or pick up at preschool and school.

On May 25, the preschool has a skills development day, when the education is closed and the guardians who have announced needs are offered care at another preschool. At least 14 days in advance, you must announce any needs so that the preschools can solve this day.

If we look a little further ahead, we will offer summer activities at preschools and leisure homes, you who need to notify this.

We also feel that the dialogue has continued to be good between our operations and the home and the administration expects everyone to contribute and take great continued responsibility and adhere to prevailing guidelines. Be at home with symptoms, healthy children and students will continue to come to preschool and school.

Greetings
